

Jumping Jesus Instructions

1. Color the Jesus figure.

2. Use a pin to poke a hole in two opposite corners of your carton square.

3. Use a pencil to make the hole big enough to poke a rubber band through.

4. Cut a rubber band and thread it through both holes.

5. Tape the rubber band in place on the outside of the carton square. You'll want about 2 inches stretching in between the two corners.

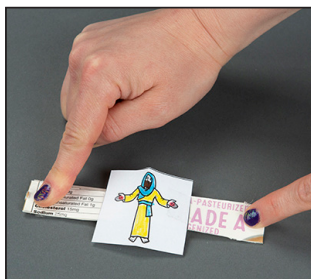

6. Fold your Jesus figure in half, and tape it over a corner that doesn't have a rubber band poked through it.

7. Decorate the milk carton with stickers.

8. Stretch your Jumping Jesus toy so that the Jesus figure lies flat on top while the two corners with the rubber band are stretched as far apart as possible.

9. Release the toy and watch Jesus spring to life!
